

MICROBE-LIFT DGTT

MICROBE-LIFT DGTT is specifically formulated for grease degradation in industrial and municipal line and trap systems. The product are designed and produced by Ecological Laboratories Inc. in USA, with high capability, effectiveness and environmental friendly, it is suitable for treatment of almost industrial and municipal waste water sources.

MICROBE-LIFT DGTT will eliminate odor and provide significant reduction in line and trap maintenance. Degrades grease, fat and oils, reduces line and trap deposits and accumulations, resulting in lower fats, oil and grease (FOG):

- ✚ Provide rapid breakdown, degradation of slow-to-degrade Fats, Oils & Grease (FOG)
- ✚ Remove fats, oil & grease, increase flowing, prevent piping jammed...
- ✚ Reduce odor, reduce system operation cost and maintenance
