

MICROBE-LIFT SA

MICROBE-LIFT SA is designed to control and remove sludge, and further reduce COD, BOD, TSS in wastewater systems. The product are designed and produced by Ecological Laboratories Inc. in USA, with high capability, effectiveness and environmental friendly.

MICROBE-LIFT SA contains natural, organic-based humates and humic constituents. They significantly speed microbial response to difficult-to-degrade organic matter, resulting in significant reduction in sludge volumes through rapid oxidation of many slow-to-degrade compounds.

- ✚ Enhance sludge degradation, reduce COD, BOD, TSS, odor ...
- ✚ Increase system capacity & capability, effective within large pH range 4 – 10.
- ✚ Reduce system operation cost and maintenance

SPECIAL FORMULATED FOR SLUDGE REDUCTION

INDUSTRIAL WASTE WATER

MUNICIPAL WASTE WATER

LAKE & POND TREATMENT

BIOGAS SLUDGE TREATMENT

AQUAFISH POND TREATMENT

HOTEL, BUILDING & RESTORANT

GENERAL INFORMATION
